

CHAMBER LOW CARBON

HELPING BUSINESSES GO GREEN & ACHIEVE NET ZERO

Low Carbon Support For Your Business

Miranda Barker

CEO East Lancashire Chamber of Commerce

WWW.CHAMBERLOWCARBON.CO.UK

Why do businesses need to act?

Reduce energy bills – matter of survival

- Energy efficiency - reduce energy use
- Behaviour change - change when power used – reduce energy costs
- Generate on site – reduce dependence on grid

Maintain access to your markets

- Your customers - will require it if they are large/international/proactive
- Obtain finance/insurance - banks & insurers will require it
- Supply to public sector – Carbon Reductions Plans for all soon

& Carbon Taxation will come!

Who is the support for, How & Why?

- Fully funded
 - Small to Medium Enterprises (SME's)
 - Charities/Social Enterprises/Community Interest Companies
 - Large Companies – over 250 employees through their supply chains
-
- Save money - reduce energy bills
 - Increase energy efficiency, encourage on site generation
 - Develop Carbon Reduction Plans to access Govt supply chains
 - Meet stakeholders', employees' and investors' needs

Award winning – World Chambers Congress - Climate Action project of 2021

Lancashire
Enterprise Partnership

Overview & Ambition

This is an exciting time for Lancashire. Our energy and low carbon sector is diverse, with a range of sub-sectoral strengths which in their own right present a compelling offer. However when combined with our strong manufacturing and engineering heritage, our technological expertise and significant innovation asset base, as a county this translates into a formidable narrative with huge potential and unrivalled capabilities to contribute to the Government's Net Zero and levelling-up ambitions, not to mention furthering Lancashire's ability to export technology solutions to the world.

These are exciting times, but the best is yet to come.
