Students

A national network of cyber resilience centres

Established in 2019 the NWCRC is a trusted, ethical, joint venture between North West Regional Organised Crime Unit and now forms part of a **network** of regional Cyber Resilience Centres.

Our ambition is for every small business to have the knowledge, skills and tools to protect themselves from online crime.

What is the risk to business?

50% small businesses
suffered a cyber attack in the
last 12 months

14% of businesses train
staff in cyber security

7.8m estimated cyber
attacks against businesses

20% of businesses have
tested their responses

What are the current threats?

Phishing

Phishing involves criminals sending un-targeted, mass emails to many people asking for sensitive information (such as login details) or encouraging them to visit a fake website.

Impersonation

Impersonation can include fraudsters pretending to be your business by hijacking your invoices and contacting your customers in order for them to be paid instead of you.

Ransomware

Ransomware (including Malware) is malicious software that can damage your network, make your systems unusable or encrypt your data until you make a payment to the cyber criminals.

How can the NWCRC help businesses?

Free NWCRC Membership

Free membership for any organisations

Long term support and guidance to build resilience

Access to cyber security resources and templates

Regular blogs and threat intelligence updates

nwcrc.co.uk/free-membership

Lancashire Cyber Security Programme

Using proceeds of crime to provide funded cyber security support for businesses across Lancashire

Who is it for?

Small and medium sized businesses and organisations based in Lancashire

What does it include?

- Free membership with the centre
- Security awareness training for up to 5 people
- 1-2-1 session with a cyber expert to answer specific questions
- Access to cyber security guidance, template policies and procedure document
